

FIND & SEARCH — FFF.NVIM

|                                  |                                     |
|----------------------------------|-------------------------------------|
| <span>Spc</span> <span>sf</span> | Find files                          |
| <span>Spc</span> <span>sg</span> | Live grep                           |
| <span>Spc</span> <span>sz</span> | Live grep — fuzzy + plain           |
| <span>Spc</span> <span>sw</span> | Grep word under cursor              |
| <span>Spc</span> <span>sr</span> | Project search & replace (grug-far) |

MOVE — LEAP.NVIM

|                 |                                    |
|-----------------|------------------------------------|
| <span>s</span>  | Leap forward — then 2 chars        |
| <span>S</span>  | Leap backward — then 2 chars       |
| <span>gs</span> | Leap across windows — then 2 chars |

YANK RING — YANKY.NVIM

|                                 |                              |
|---------------------------------|------------------------------|
| <span>Spc</span> <span>p</span> | Yank-history picker          |
| <span>[y</span> <span>]y</span> | Cycle ring after a paste     |
| <span>gp</span> <span>gP</span> | Put after / before selection |
| <span>]p</span> <span>[p</span> | Put with the current indent  |

SURROUND — MINI.SURROUND (GZ)

|                                   |                              |
|-----------------------------------|------------------------------|
| <span>gza</span>                  | Add — then textobject + char |
| <span>gzd</span>                  | Delete surrounding           |
| <span>gzc</span>                  | Replace surrounding          |
| <span>gzf</span> <span>gzF</span> | Find next / prev surrounding |
| <span>gzh</span>                  | Highlight surrounding        |
| <span>gzaiw"</span>               | Quote a word (example)       |

FORMAT & LSP

|                                  |                           |
|----------------------------------|---------------------------|
| <span>Spc</span> <span>cf</span> | Format buffer (conform)   |
| <span>Spc</span> <span>cF</span> | Format injected languages |
| <span>Spc</span> <span>cm</span> | Open Mason                |
| <span>Spc</span> <span>cr</span> | LSP rename symbol         |
| <span>Spc</span> <span>ca</span> | LSP code actions          |

CLAUDE — CLAUDECODE.NVIM

|                                                                   |                               |
|-------------------------------------------------------------------|-------------------------------|
| <span>Spc</span> <span>ac</span>                                  | Toggle Claude terminal        |
| <span>Spc</span> <span>af</span>                                  | Focus Claude                  |
| <span>Spc</span> <span>ar</span> <span>Spc</span> <span>aC</span> | Resume / continue session     |
| <span>Spc</span> <span>ab</span>                                  | Add current buffer to context |
| <span>Spc</span> <span>as</span>                                  | Send selection / add file     |
| <span>Spc</span> <span>aa</span> <span>Spc</span> <span>ad</span> | Accept / deny diff            |

GIT & UTILITY — SNACKS.NVIM

|                                                                  |                                      |
|------------------------------------------------------------------|--------------------------------------|
| <span>Spc</span> <span>gg</span>                                 | Lazygit (root) — gG for cwd          |
| <span>Spc</span> <span>gb</span>                                 | Git blame line                       |
